New Survey Reports Wages for the Rockford, IL Metropolitan Statistical Area

Workers in the Rockford, IL Metropolitan Statistical Area (MSA) averaged \$14.37 per hour during June 1998, according to a new wage survey released by the U. S. Department of Labor's Bureau of Labor Statistics. Peter J. Hebein, Regional Commissioner for the Bureau in Chicago, noted that white-collar workers recorded the highest average wage at \$18.11 per hour and accounted for 39 percent of the workers studied. Blue-collar workers averaged \$12.82 per hour and represented 48 percent of the workers, while the remaining 13 percent worked in service occupations and earned \$8.32 per hour.

The National Compensation Survey (NCS) presents straight-time earnings for all occupations in establishments with 50 or more employees in private industry and state and local government, but excludes those in agricultural establishments, private households, self-employed and the federal government. This survey covered 506 establishments representing 113,193 workers within the Rockford, IL Metropolitan Statistics Area (MSA) which includes Boone, Ogle and Winnebago Counties. The National Compensation Survey provides broader coverage of occupations and establishments within the survey area than did previous salary studies and will eventually integrate three separate surveys of wages and benefits into a single comprehensive compensation program.

Average hourly wages were published for 71 detailed occupations. Among white-collar workers, registered nurses averaged \$16.39, secretaries averaged \$11.42, and teachers' aides \$7.57 per hour. Among the blue-collar occupations, electricians earned \$19.61 per hour, machinist earned \$15.81 and truck drivers earned \$17.45. Finally, service workers included public service police and detectives at \$15.54 hourly, cooks at \$8.62, and janitors and cleaners at \$9.95 per hour. (See table A-1.)

Private industry workers in the Rockford area earned \$13.74 per hour and accounted for 86 percent of the workers studied. State and local government workers made-up the remainder and averaged \$19.11 hourly. (See table A-2). Wage data are also available by selected characteristics such as full/part-time

status, union/nonunion status, and establishment size. Overall, wages for full-time workers averaged \$14.96 per hour, compared to \$8.59 per hour for part-time workers. Surveyed union workers had an average hourly rate of \$16.85, and their nonunion counterparts averaged \$13.57. Employees averaged \$12.93 in establishments with 100-499 workers and in establishments with 500 workers or more, average pay was \$15.94 per hour. (See tables C-1 and C-3). Subject to publication criteria, average rates of pay are also available for occupations based on knowledge, skill, independent judgment, supervision received and other factors required for the job. Survey findings are used by business, labor, academicians, and state and local government officials in wage and salary administration, collective bargaining negotiations, business relocation planning, and occupational counseling.

Survey Availability Information

Complete published results of the June 1998 National Compensation Survey, Rockford, IL, MSA are available on the Internet as Adobe Page Definition Files (PDF) and as text files (tables only) through the National Compensation Survey home page at: http://stats.bls.gov/comhome.htm

Survey results are also available from the Bureau's automated fax-on-demand service in Chicago at (312) 353-1880, menu option 1. Using a touch-tone telephone, up to four documents at a time can be ordered and faxed to you within minutes 24-hours a day.

¹ Earnings are the straight-time hourly wages or salaries paid to employees. They include incentive pay, cost-of-living adjustments, and hazard pay. Excluded are premium pay for overtime, vacations, holidays, nonproduction bonuses, and tips. The mean is computed by totaling the pay of all workers and dividing by the number of workers, weighted by hours. The 10th, 25th, 50th, 75th and 90th percentiles designate position in the earnings distribution. At the 50th percentile, the median, half of the workers receive the same as or more than the rate shown, and half receive the same as or less than the rate shown. At the 25th percentile, one-fourth of the workers earn the same as or less than the rate shown. At the 75th percentile, one-fourth earn the same as or more than the rate shown. The 10th and 90th percentiles follow the same logic.

² All workers include full-time and part-time workers. Employees are classified as working either a full-time or a part-time schedule based on the definition used by each establishment. Therefore, a worker with a 35-hour-per-week schedule might be considered a full-time employee in one

establishment, but classified as part-time in another firm, where a

40-hour week is the minimum full-time schedule.

3 A classification system including about 480 individual occupations is used to cover all workers in the civilian economy. Individual occupations are classified into one of nine major occupational groups.

NOTE: Dashes indicate that no data were reported or that data did not meet publication criteria. Overall occupational groups and occupational levels may include data for categories not shown separately. N.E.C. means "not elsewhere classified.

NOTE: Individual and average wage rates were collected in this update survey. A procedure was put into place to "move" the positional statistics where averages were collected. This procedure compares current locality survey data—at the quote level—with the same quote from the prior survey. Individual rates from the prior survey are moved by the average change in mean wages for the occupation.

¹ Earnings are the straight-time hourly wages or salaries paid to employees. They include incentive pay, cost-of-living adjustments, and hazard pay. Excluded are premium pay for overtime, vacations, holidays, nonproduction bonuses, and tips. The mean is computed by totaling the pay of all workers and dividing by the number of workers, weighted by hours. The 10th, 25th, 50th, 75th and 90th percentiles designate position in the earnings distribution. At the 50th percentile, the median, half of the workers receive the same as or more than the rate shown, and half receive the same as or less than the rate shown. At the 25th percentile, one-fourth of the workers earn the same as or more than the rate shown. The 10th and 90th percentiles follow the same logic.
All workers include full-time and part-time workers. Employees are classified as

another firm, where a 40-hour week is the minimum full-time schedule.

NOTE: Dashes indicate that no data were reported or that data did not meet publication criteria. Overall occupational groups and occupational levels may include data for categories not shown separately. N.E.C. means "not elsewhere classified."

NOTE: Individual and average wage rates were collected in this update survey. A procedure was put into place to "move" the positional statistics where averages were collected. This procedure compares current locality survey data—at the quote level—with the same quote from the prior survey. Individual rates from the prior survey are moved by the average change in mean wages for the occupation.

² All workers include full-time and part-time workers. Employees are classified as working either a full-time or a part-time schedule based on the definition used by each establishment. Therefore, a worker with a 35-hour-per-week schedule might be considered a full-time employee in one establishment, but classified as part-time in

³ A classification system including about 480 individual occupations is used to cover all workers in the civilian economy. Individual occupations are classified into one of nine major occupational groups.
